Sun Protection

Policy Statement
This Policy outlines Meerilinga’s commitment to sun protection and our responsibility to protect the children, Educators, staff and visitors to the Centre from skin damage caused by harmful ultraviolet (UV) radiation from the sun.

Our Early Learning Programs are recognised as a Sunsmart Centres by the Cancer Council of Western Australia.

Policy Purpose
This policy provides guidelines to:

- Ensure all children, educators and staff are well protected from too much UV exposure by using a combination of the sun protection measures whenever UV levels reach 3 and above.
- Ensure all children, educators and staff have some UV exposure for vitamin D.
- Ensure the outdoor environment is sun safe and provides shade for children, educators and staff.
- Ensure children are encouraged and supported to develop independent sun protection skills.
- Support duty of care and regulatory requirements.
- Support appropriate WHS strategies to minimise UV risk and associated harms for Educators, staff and visitors.

Scope
This policy applies to children, families, staff, management and visitors of the service.

Exclusions

Policy Review
At least annually or from time to time the organisation may make changes to this policy to improve the effectiveness of its operation.

Implementation
In accordance with Regulation 168 Meerilinga’s Sun Protection guidelines have been developed to enable children, workers and visitors of Meerilinga Services are protected from skin damage caused by harmful ultraviolet (UV) sun radiation. Services will maintain the Sunsmart recognition through annual assessment of adherence.
Outdoor Activity

The service will use a combination of the five (5) sun protection measures whenever UV Index levels reach 3 and above.

Cancer Council Factsheet on Be SunSmart at:

The UV index forecast will be sourced and noted daily for educators and staff to refer to - https://www.myuv.com.au/

Lead Educators will assess the risk of continuing to play outdoors when the UV level reaches very high (8) and above. Attentive to children’s safety and comfort, decisions are made in the interest of the children’s wellbeing.

Some sun exposure is important for vitamin D which is essential for healthy bones and muscles, and for general health. Between August and May, most Western Australians can get enough vitamin D through incidental sun exposure in their day to day activities. During this period the focus should be on sun protection.

In Australia, sensible sun protection does not put people at risk of vitamin D deficiency https://www.cancerwa.asn.au/prevention/sunsmart/vitamindandsunprotection/

All sun protection measures will be considered when planning special outdoor events within the centre, such as walks in the community and excursions. Plans or programs may need to be altered to ensure compliance of this policy.

Shade

- Adequate shade will be provided and maintained for outdoor play.
- Shade options can include a combination of portable, natural and built shade.
- Educators will consider the availability of shade when planning and implementing outdoor activities and excursions (such as verandas, pergolas, shade shelters, large leafy trees)
- Play activities may be moved throughout the day to take advantage of shade patterns.
- Shade does not guarantee total protection, so hats, protective clothing and sunscreen will also be used.
Hats
- Educators, staff and children are required to wear a broad brimmed, bucket or
  legionnaires style hat that protects their face, neck, ears and crown of the head
  whenever they are outdoors.

- Children without a sun safe hat will remain protected from the sun. They will be
  provided with a spare hat or participate in activities either under the verandah or
  indoors.

Clothing
- When outdoors, Educators, staff and children will wear clothing that covers their
  shoulders and protects as much of the skin as possible. Recommended clothing
  includes collars, elbow length sleeves, and knee length or longer style shorts and
  skirts. Please note: midriff or singlet top, thin strap dresses do not provide enough
  sun protection therefore are not recommended.

Refer to Section 4 Policy – Employee Dress Code

- Children without appropriate clothing will remain protected from the sun. Sun safe
  clothing can be provided with spare clothing or participate in activities either under
  the verandah or indoors.

Sunscreen
- All Educators, staff and children will apply SPF30+ or higher broad-spectrum water
  resistant sunscreen 20 minutes before going outdoors and re-apply every 2 hours.

- The service will provide SPF 30+ or higher broad - spectrum water resistant
  sunscreen for the Educators, staff and children.

- Families will be encouraged to apply sunscreen to their child prior to or upon arrival
  to the service.

- Where appropriate, children are encouraged and supported to apply their own
  sunscreen under the supervision of staff.

- Sunscreen is stored in a cool, dry place and the use-by-date monitored.

- If a child presents with a reaction to the services sunscreen, the family will be notified
  and asked to provide an alternative (non-reactive) sunscreen for their child to use at
  the service.

Sunglasses
- If practical, Educators, staff and children are encouraged purchase and wear
  sunglasses that meet the Australian standard when outdoors. Sunglasses and a sun
  safe hat provide very good eye protection.

- Sunglasses that meet Australian Standards will be labelled with the Australian
  Standard number AS/NZS 1067.1:2016 or EPF10+ rating to ensure that the
  sunglasses block out sufficient UV radiation.

Note: Sunglasses sold as toys or fashion spectacles may not meet the Australian
Standard.
Protective Practices

Educators will be responsible for adhering to the strategies and practices of the Sun Protection policy and procedures. Educators and staff who do not comply will be in breach of this policy.

Educators and staff will act as role models and demonstrate sun safe behaviour to families and children by:
- Wearing a sun safe hat (see Hats).
- Wearing sun safe clothing (see Clothing).
- Applying SPF30+ or higher broad-spectrum water-resistant sunscreen 20 minutes before going outdoors.
- Using and promoting shade.

Through the process of enrolment into our service, families will be:
- Informed of the Sun Protection Policy.
- Required to give authority and directive for educators to administer the services sunscreen to their child or provide the service with an alternative if necessary.
- Required to dress their child in appropriate sun protective clothing and provide a suitable sun protective hat to remain at the service.
- Encouraged to practice sun protective behaviours themselves.

Educator, staff and children’s hydration levels will be maintained. Safe drinking water will be accessible to children throughout the day in both indoor and outdoor settings.

Educators will be aware that broad brimmed hats with toggles may be a choking hazard to children.

Educators will be aware of surfaces in their outdoor area which may become very hot in the sun.

Education

Learning about sun protection and ways to protect skin from UV exposure will be incorporated into the learning program. Educators will actively promote sun protection through discussion of activities undertaken with children.

Sun protection information will be promoted and the policy made available to Educators, staff, families and visitors of the service.
## Sun Protection Process

| **1. Sun Protection**  
  1. Through the enrolment process, families will be informed of the services Sun Protection policy and asked to provide a suitable sun protective hat and clothing for their child.  
  2. The UV index forecast will be sourced and noted daily for educators and staff to refer to - [https://www.myuv.com.au/](https://www.myuv.com.au/)  
  3. Where possible, outdoor activities and excursions will be scheduled outside peak UV times.  
  4. A combination of the five (5) sun protection measures will apply whenever UV Index levels reach 3 and above.  
  5. When planning outdoor activities, Educators will assess where and when shade falls throughout the day. A combination of portable, natural and built shade will be used.  
  6. Lead Educators will assess the risk of continuing to play outdoors when the UV level reaches very high (8) and above. Attentive to children’s safety and comfort, decisions are made in the interest of the children’s wellbeing.  
  7. Educators, staff and children are required to wear a broad brimmed, bucket or legionnaires style hat that protects their face, neck, ears and crown of the head. Children without a sun safe hat will remain protected from the sun.  
  8. Educators, staff and children will wear clothing that covers their shoulders and protects as much of the skin as possible. Children without appropriate clothing will remain protected from the sun.  
  9. The service will provide SPF 30+ or higher broad-spectrum water resistant sunscreen for the Educators, staff and children. To be applied 20 minutes before going outdoors and re-applied every 2 hours. Families will be informed if their child has an adverse reaction to the services sunscreen and asked to provide an alternative.  
  10. Learning about sun protection and ways to protect skin from UV exposure will be incorporated into the children’s learning program.  
  11. Educators and staff will act as role models and demonstrate sun safe behaviour to families and children. |
